

Notes on how to find what is demonstrated on a computer in the YouTube on a phone.

Custom Labels on Phone – See phone Pix with Red Arrow

1. Search by address or tap on spot
2. Below the map, tap on the address or Name of Business
3. If it's a business – tap on 3 dots in the upper right corner, and choose label
If it's not a business – At the very bottom of the screen, scroll to the right to find label
4. Type in your chosen new label, then after that use it in search instead of the address or business name.

To Save a location on phone- See Phone Pix with Yellow Arrows

1. Search for a place, tap a marker, or touch and hold a spot on the map.
2. At the bottom of the screen, tap the name or address of the place
3. Tap save and choose a list. It's now on your map.

To find it later, tap saved at bottom middle & select list you saved it in.

To Measure on Phone- See Phone Pix with Blue Arrows

1. Tap to put a red pin at the start of where you want to measure.
2. At the pop-up at the bottom, tap measure distance.
3. Move the map, not the point, to put the point where you want it.
4. Tap Add Point. (repeat as needed, if not a straight line.)

Find "Traffic" button under Layers on a phone

Notes on how to find what is demonstrated on a phone in the YouTube on a computer.

Directions – Arrival or Leave later – on a **computer** – find after you've put in start & destination. See "leave" with down arrow under destination box.

***update **On phone, find in 3 dots at top right instead of bottom.**

Location Sharing on computer is in Menu by Search.

On Computer – Avoid Tolls etc. After putting in starting point & destination, choose "options" to the right of "leave"

To add a Stop on the Computer -

Public Transportation
